Market Highlights

Visitation from Australia is forecasted to recover to pre-pandemic levels in 2025, exceeding 2019 visitation by +15%.[€]

A large majority of travellers from Australia utilize travel agents, with this number expected to grow for post-COVID travel.^{**}

Australian travellers are committed to their international holiday spending, with most planning to spend over AUD \$10,000 (CA \$8,937). Despite cost of living pressures, 58% have unchanged travel plans, 60% are willing to invest more in experiences, and 55% prioritize saving for travel. Travel ranks as the top discretionary expense for Australians in 2023.[€]

In the period from January to June 2024, Australia is projected to see a robust increase in air capacity of 15% compared to the same period in 2023. This increase signals reinforcement of travel intent to British Columbia.[◇]

Key motivators for Australian travellers choosing Canada include safety, a longstanding desire to visit, and engage in outdoor experiences. The primary barriers are cost and travel distance, with both concerns being more significant for those aged 55 and above.[¶]

Over 50% of Australian travellers are mindful of their travel’s personal impact on destinations, with many willing to invest more in responsible travel options. Despite this, a smaller proportion considers this availability in Canada as a decisive factor.[¶]

Australians are eager to resume international travel, bolstered by a strong economy.

Market Highlights

Visitation from China is not forecasted to return to pre-pandemic levels until after 2027, as the pace of recovery is influenced by the current state of Canada-China relations.

China is not expected to return to pre-pandemic levels until approved destination status is re-established. Furthermore, China’s decision to maintain group tour restrictions on Canada, in contrast to the easing of restrictions for other nations, is impacting the Canadian tourism sector. The absence of group tours from China is leading to a noticeable decline in tourism revenue and a reduction in flights to Canada.[¶]

Before the pandemic, Chinese travellers were attracted to extravagant travel packages, such as Trip.com’s \$250,000 “Around the World” tour. Post-pandemic, the trend has shifted towards longer planning periods and a focus on wellness and personalized experiences in travel. Safety has become a critical factor in deciding travel destinations, marking a significant change from pre-pandemic preferences.”

For China, there is a slight reduction of 1% in air capacity for the period of January to June 2024, compared to 2023.[◇]

Air Canada has increased their capacity from YVR to Narita and Hong Kong.[¥] This move could bolster air support for Free Independent Travellers (FIT) from China. While group travel cannot be promoted by Chinese travel agents at this time, there is still FIT travel coming to BC and Canada.[¥]

Market Highlights

Visitation from Germany is not forecasted to recover to pre-pandemic levels until after 2027.

Driven by governmental efforts, Germany is witnessing a growing focus on sustainability. Destinations providing options for responsible and conscious travel are likely to appeal to German tourists.[€]

Germany is set to witness a substantial increase of 17% in air capacity for the first half of 2024 versus the same period in 2023, indicating a strong recovery and renewed interest in travel to British Columbia.^Δ

German travellers prioritize great deals, a desire to visit, and outdoor experiences when choosing Canada. Cost remains the primary barrier, with health and safety concerns diminishing as vaccine availability increases. Visa requirements, limited vacation time, weather, and travel distances within Canada are emerging concerns.^μ

Approximately 50% of German travellers are aware of their travel's environmental and social impact, with a similar proportion willing to pay more for responsible travel options. However, only a small percentage (11% for eco-friendly and 8% for socially responsible travel options) prioritize these factors when choosing Canada as a destination.^μ

Market Highlights

Visitation from Japan is not forecasted to recover to pre-pandemic levels until after 2027.

In 2023, Japan has seen a notable rise in outbound international travel. The number of Japanese travellers venturing overseas has reached 8.4 million, a striking 289.7% increase from 2022 and 40.4% higher compared to 2019. This uptick is a clear indication of outbound travel's vigorous recovery as COVID-19 restrictions have eased."

The air capacity in Japan is forecasted to increase by 6% during January to June 2024 compared to the same period in the previous year, indicating a positive trajectory in travel dynamics.[◇]

When selecting Canada, Japanese travellers highly value relaxation (42%) and personal connections (40%), giving considerable importance to safety considerations (39%) as well. Personal media exposure influences 32% of their decisions, while cost (24%) and travel distance (20%) emerge as primary concerns. Additionally, a desire for familiarity with the destination (17%) and scheduling flexibility (15%) play roles in their choices."

Japanese travellers show a high regard for sustainable travel, with 71% considering Canada to be an environmentally friendly destination and 64% viewing it as a socially responsible one. Nonetheless, only 17% factor in eco-friendly travel activities, and a mere 8% look for socially responsible options when selecting their travel destination."

Visitation from South Korea is forecasted to recover to pre-pandemic levels in 2025, exceeding 2019 visitation by +18%.

In South Korea, burnout rates have reached unprecedented levels, leading to a widespread desire for relaxation, a break from the routine, and personal growth. Canada is ideally situated to meet these needs for wellbeing. The primary reason South Koreans choose to visit Canada is to experience relaxation and rejuvenation.”

South Korea is anticipated to have a steady 2% increase in air capacity for the first six months of 2024 compared to those in 2023, reflecting sustained travel interest.[◇]

Relaxation and safety are key motivators for South Koreans considering Canada, with a special emphasis on eco-friendly travel for recent visitors. The primary obstacles for travellers are flight duration (39%) and overall cost (33%), with an increased consideration for weather concerns.^μ

Market Highlights

Visitation from the United Kingdom is forecasted to recover to pre-pandemic levels in 2027, exceeding 2019 visitation by +1%.

UK households are currently experiencing record-high savings, anticipated to boost international travel demand. As British travellers seek to compensate for missed opportunities and gather their families, there is an expected increase in multi-generational trips. These trips are often aimed at bucket list destinations, including places like Canada.[<]

The United Kingdom shows a notable uplift of 11% in air capacity for January to June 2024 when compared with the same months in 2023, highlighting British Columbia’s growing prominence as a destination among British travellers.[◇]

For UK travellers, safety is the foremost consideration (40%) when choosing Canada, with outdoor and city experiences also highly valued. Cost remains the primary concern (33%), with visa requirements and weather conditions also influencing their decision to travel. The search for deals, once a significant motivator, has become less critical at 21%.^μ

Over half of UK travellers are mindful of their impact on travel destinations, with 67% considering Canada environmentally friendly and 67% viewing it as socially responsible. Despite this awareness, only 10% factor in eco-friendly travel options, and 8% consider socially responsible options as influential in their choice of Canada.^μ
