About the Survey

The BC Tourism Climate Resiliency Initiative (BCTCRI) is a province wide project that is building a foundational program to support a resilient tourism sector that is prepared to adapt to climate change.

The purpose of this survey is to help inform climate adaptation and environmental sustainability program needs. Conducted among tourism businesses in February 2025, this survey gathered baseline data that will be used to inform and track improvements over time.

Number of completed surveys:

Shuswap-North Okanagan - 36

Province-wide - 572

Sentis Research assisted with the analysis and reporting of the results.

This report is based on a sample size of fewer than 50 respondents. While the findings offer useful insights, they should be interpreted with caution and are not necessarily representative of all tourism businesses in this category or area. The results are indicative only and should not be generalized beyond the sample group.

Participating Communities
