* In July 2025, Statistics Canada integrated information about travellers processed through the Canada Border Services Agency's Integrated Primary Inspection Line – Air (IPIL Air) system into the Frontier Counts. The unadjusted data series from January to June 2025 were also updated during the July release. This new data source improves the accuracy of Frontier Counts by addressing existing data gaps at some ports of entry. It is advised to exercise caution when comparing 2025 reference months and onwards with previous years.

** In April 2022, Statistics Canada changed the mode of transport classification for international ferry ports to align with UNWTO standards. In addition, due to advances in data collection via the E63-1 form at water ports, trip lengths of ferry/cruise passengers are no longer comparable to previous years. As a result of these methodology changes, year-over-year comparisons for U.S.A Same Day and Overnight visitation are not provided.

*** There are large variations in percent changes between 2025, 2024, and 2019 International Visitor Arrivals. Please note, a percent change is amplified when an increase or decrease is seen on smaller values and should be interpreted with caution.

**** This publication includes overseas arrivals for all durations, including Same Day and Overnight. Due to Covid-19, Statistics Canada is not producing Overnight arrivals data for countries other than the U.S.A. at this time. Please note that prior to Covid-19 adjustments, Destination BC published data for Overnight visitors only.

Note: Customs entries include
international visitors who cross Canada
Customs in British Columbia. These
figures do not account for all visitors to
BC, as domestic visitors are excluded as
well as international visitors who cross
Canada Customs outside BC, yet still
travel to BC. Likewise, customs entries
include visitors that cross Canada
Customs in BC, but who continue on to
other provinces.
