# RESEARCH INFORMATION & METHODOLOGY

More information, including Local Series, Regional Series, and Provincial-level reporting can be found at [destinationbc.ca/research-insights/type/resident-research/](https://destinationbc.ca/research-insights/type/resident-research/)

Online surveys were completed by BC residents using online panels via Sentis Research

Results are weighted by tourism region, age, and gender to be representative of BC's overall population

Regional and local level results are separated by municipality border using Forward Sortation Areas (FSA). For this report, sortation areas used were as follows:

Most questions asked in a five-point agreement scale: Strongly Agree (5), Agree (4), Neither Agree nor Disagree (3), Disagree (2), Strongly Disagree (1)

CCC FSAs: V2G, V2J, V0L

On page 1, top two questions reported as percentage of respondents who answered Strongly Agree (5) and Agree (4). The remaining respondents not included in the reported percentage answered Neither Agree nor Disagree (3), Disagree (2), or Strongly Disagree (1)

Generally, respondents who responded 'Don't Know / Not Sure' were excluded from the results of that question

Regional level results are separated by municipality border using Forward Sortation Areas (FSAs)

The online survey was fielded in November 2025

Total sample size used in this report are as follows:

|     |       |
|-----|-------|
| BC  | 5,409 |
| CCC | 53    |
